

SASIDHARAN CHANDRAN

csasi1928@gmail.com | 9943466496 | [LinkedIn](#) | [Github](#)

Computer Science and Design student with a interest in software development, problem-solving, and continuous learning. Through internships and projects, I have gained hands-on experience in building practical solutions using React, Node.js, MongoDB, and Python. I possess strong analytical thinking, adaptability, and a collaborative mindset, and I am eager to apply my skills to solve real-world challenges in a professional environment.

EXPERIENCE

Quality Control Intern - Versa Drives Pvt Ltd | Nov 2023 – Dec 2023

([Certificate](#))

- Conducted quality inspection and testing of industrial components, ensuring compliance with manufacturing standards and product reliability.
- Supported defect analysis and production process monitoring to maintain quality standards and improve operational efficiency.

TECHNICAL SKILLS

- **Programming Languages:** C++, Java, Python
- **Web Development:** HTML, CSS, JavaScript, React, Node.js, REST APIs
- **Database Technologies:** MySQL, MongoDB, DBMS
- **Computer Science Fundamentals:** Data Structures, Operating Systems, Computer Networks
- **Tools & Platforms:** GitHub, VS Code, Excel, Figma, Canva, Blender, Godot

PROJECTS

• Community Event Platform

Tech Stack: React, Node.js, MongoDB, JavaScript, REST APIs

- Developed a community event management platform with event creation, registration, and tracking.
- Implemented user authentication, admin management, and MongoDB-backed REST API integration.

• Online Grocery Ordering App

Tech Stack: React, Node.js, MongoDB, JavaScript, REST APIs

- Developed a full-stack grocery ordering platform with authentication, cart management, and order tracking.
- Integrated MongoDB, REST APIs, and admin controls for inventory and order management.

• AI Based Crowd Management System

Tech Stack: Python, OpenCV, YOLO, Machine Learning, Deep Learning

- Developed a real-time crowd monitoring system using YOLO and OpenCV for people detection and density analysis.
- Integrated object tracking and automated alerts to identify overcrowding and enhance public safety.

• Expert Session Booking System

Tech Stack: React, Node.js, MongoDB, JavaScript, REST APIs

- Developed a full-stack platform for booking expert sessions with user authentication, appointment scheduling, and session management.
- Implemented MongoDB-backed REST APIs for secure user management, booking operations, and real-time appointment tracking.

• IR-Based Traffic Density Detection System

Tech Stack: Embedded Systems, IR Sensors, Arduino

- Developed a smart traffic control system using IR sensors to detect vehicle density and dynamically optimize signal timing.
- Improved traffic flow efficiency by reducing congestion and unnecessary signal delays

EDUCATION & CERTIFICATIONS

- B.E. Computer Science and Design, SKCET, Coimbatore (2024–2027)
- Diploma in Electronics and Communication Engineering, NPTC, Pollachi (2021–2024)
- AWS Cloud Practitioner Essentials | Infosys Springboard (DSA, React, Java, DBMS) | Coursera – Introduction to Artificial Intelligence | NPTEL – Ethics in Engineering Practice
